

BAUSCH DATACOM PRODUCTS DESIGNED FOR MAC™ OS!

Bausch Datacom, founded in 1987, is one of the pioneers in the European PC Communications industry. As leading developer, manufacturer and supplier of modems, ISDN equipment, software tools and as system integrator of specific communication solutions in cooperation with partners like Lucent Technologies (Wireless LAN), the company has evolved a very stable market position in the Benelux, France and Germany.

Until today over 800.000 connectivity solutions installed throughout Europe. The 'connected by Bausch' logo stands for quality and hassle free connectivity which is highly appreciated by our clients in the banking, insurances, industry and consumer market as well.

Bausch Datacom now starts with his own range of modems and ISDN products which are designed for the Mac™.

A wide range of modem and ISDN solutions for serial, USB and PCMCIA interface. In fact, 56K analogue and 128K ISDN datacommunication for all possible use. The Bausch technical support follow-up will also be available for our Mac OS modems and ISDN adapters.
